As Told by Immigrant and Refugee Children

This 13-minute DVD provides an overview of English Language Learners, grades 3-5, as they create their own life stories in pictures first and then in words. The art-based literacy process used, Image-Making Within The Writing Process®, utilizes collage made from hand-painted textured papers created by each student. (Many of these students, born and raised in refugee camps, have never even painted before.) This DVD can be shared with administrators, curriculum coordinators, teachers, pre-service teachers, students, and parents to show how powerful treating words and pictures as equal languages for learning can be.
